* The size of the packaging can be adapted to the flash drive size or shape.

Our presentation...

Decoration techniques

Screen Printing

Printing technology that consists of transferring ink through a screen stretched on a frame. The ink cannot pass through the areas where there will not be an image because an emulsion or varnish will have been applied while the ink can freely pass through the areas that have not been blocked in this way.

The substrate to be printed is placed under the frame in which the ink is placed that will be extended over the fabric using a rubber roller. The ink passes through the mesh in the image part and is placed on the paper or fabric.

Pad Printing

Printing technology that consists of a metal or plastic plate covered with a photosensitive emulsion on which the image is offset printed through a chemical process forming a gravure. This plate is covered with ink and brushed with a blade. Next, a silicon pad presses down on the plate print collecting the ink of the gravure and taking it to the piece where it will be deposited through contact.

The different shapes and hardnesses of the silicon pads allow us to deposit the ink on a large variety of substrates (flat, cylindrical, spherical, concave convex) and materials (metal, plastic, etc.)

Laser Engraving

We can obtain a permanent, unchangeable and precise print with laser printing technology on different types of materials where the best results are obtained on metal products.

We influence the product substrate by using laser and this ensures we can eliminate the material's surface part.

Colours cannot be replicated by using this technology. The print colour is determined by the material and/or the coat that covers the product.

Doming

This technology consists of applying an epoxy resin to self-adhesive labels that have been previously printed to give them volume.

This ensures that a label is obtained with bright volume that is nice to touch. We obtain a 3D effect.

Non Woven bags

75065

Drawstring backpack regular non woven

Drawstring backpack with black draw cords.
